

Sanlam Annual Results Investor Presentation 2021

The Sanlam Group's International Financial Reporting Standards (IFRS) financial statements for the 12 months ended 31 December 2021 are presented based on and in compliance with IFRS. The basis of presentation and accounting policies for the IFRS financial statements and shareholders' information are, in all material respects, consistent with those applied in the 2020 Integrated Report and Annual Financial Statements.

The comparative shareholders' information has been adjusted to reflect the structural changes in the second half of 2020, where applicable.

All references to 2020 and 2019 relate to the full 12-month period for those years, unless otherwise stated.

### **Forward-looking statements**

In this report we make certain statements that are not historical facts and relate to analyses and other information based on forecasts of future results not yet determinable, relating, among others, to new business volumes, investment returns (including exchange rate fluctuations) and actuarial assumptions. These statements may also relate to our future prospects, developments and business strategies. These are forward-looking statements as defined in the United States Private Securities Litigation Reform Act of 1995. Words such as "believe", "anticipate", "intend", "seek", "will", "plan", "could", "may", "endeavour" and "project" and similar expressions are intended to identify such forward-looking statements but are not the exclusive means of identifying such statements. Forward-looking statements involve inherent risks and uncertainties and, if one or more of these risks materialise, or should underlying assumptions prove incorrect, actual results may be very different from those anticipated. Forward-looking statements apply only as of the date on which they are made, and Sanlam does not undertake any obligation to update or revise any of them, whether as a result of new information, future events or otherwise. Any forward-looking information contained in this announcement has not been reviewed and reported on by Sanlam's external auditors.

### **Constant currency information**

The constant currency information included in this review has been presented to illustrate the impact of changes in the South African rand exchange rates and is the responsibility of the Group's Board of directors.

It is presented for illustrative purposes only and because of its nature may not fairly present the Group's financial position, changes in equity, result of operations or cash flows. All references to constant currency information are based on the translation of foreign currency results for the 12 months to 31 December 2021 at the weighted average exchange rate for the 12 months to 31 December 2020, which is also applied for the translation of comparative information.

The major currencies contributing to the exchange rate movements are the British pound, United States dollar, Indian rupee, Angolan kwanza, Nigerian naira and the Moroccan dirham.

Foreign currency/ZAR	Average 2021	Average 2020	Strengthening
United Kingdom	20,32	20,99	3,2%
USA	14,76	16,34	9,6%
India	0,20	0,22	9,9%
Angola	0,02	0,03	17,6%
Nigeria	0,04	0,04	14,6%
Morocco	1,64	1,73	5,1%

In respect of the Group's investment in the former Saham Group, the constant currency information only allows for the impact of the change in exchange rate between the South African rand and the Moroccan dirham on the consolidated former Saham Group results. No adjustment is made for exchange rate movements between the Moroccan dirham and the reporting currencies of the former Saham subsidiaries.

# Key performance

# indicators

# Earnings

- Operational performance has returned to pre-pandemic levels. Net result from financial services increased by 13% on 2020 (18% in constant currency) and was 4% higher than 2019 excluding one-off items.
- · Group excess mortality claims (claims above long-term actuarial assumptions, net of tax, reinsurance, annuity and disability offsets) in the life insurance businesses were R4,2 billion for 2021, with Sanlam Life and Savings (SLS) excess mortality claims of R3,6 billion and Sanlam Emerging Markets (SEM) excess mortality claims of R630 million.
- SLS excess mortality claims were offset by a package of actuarial basis changes, and premium increases on group risk business. SEM released discretionary reserves of R148 million. This release together with repricing of group risk business did not fully offset SEM excess mortality claims, leading to a net negative impact of R466 million on operating profits.
- Net operational earnings increased by 23% (28% in constant currency), reflecting higher investment income relative

# New business

- New business volumes exceeded R350 billion for the first time, up 14% on 2020 and 43% higher than 2019.
- Volume growth bolstered by strong profitability and margins. Net value of new covered business (VNB) increased by 44% on 2020 and 21% on 2019, with a new business margin of 2,87% (2,98% on a constant economic basis).
- · Net client cash flows improved substantially despite the increase in mortality claims, supported by inflows into Sanlam Investments and Sanlam Glacier. Net fund inflows of R78,3 billion were 27% higher than 2020 and 38% higher than 2019.
- The Sanlam Pan Africa (SPA) Life portfolio increased new business volumes by 23% in constant currency and VNB increased by 88% in constant currency, to over R450 million.
- Overall **persistency trends** remained ahead of long-term actuarial assumptions.

# Group Equity value

- Group Equity Value per share of R64.44 and Return on Group Equity Value (RoGEV) per share of 13.9%.
- · Annual actuarial basis changes package implemented, which included the release of discretionary reserves, reversal of half of the 5% mass lapse assumption, positive persistency assumption changes and strengthening of the mortality basis to allow for future pandemics.
- Adjusted RoGEV per share of 14,6% was above the Group's hurdle rate of 13,6%. The non-covered businesses achieved an above hurdle return which offset underperformance from the covered business. Non-covered benefited from higher valuations of the credit, general insurance and investment businesses due to improved operational performance. Covered underperformance was largely driven by the impact of COVID-19 on risk experience, strengthening of the mortality basis and the write-down of Sanlam Life and Pensions UK (SLP) to the transaction price. This more than offset strong contributions from value of new business and positive persistency experience and assumption changes. The upward revaluation of the UK wealth and financial planning businesses to transaction price, offset the write-down of SLP, resulting in an aggregate positive impact on adjusted RoGEV from the UK entities being disposed of as part of the Group's strategy execution.

# Dividend and capital

- The Group declared a normal dividend of 334 cents per share, up 11% on 2020.
- · Group solvency ratio remains strong at 173%, well within the target range.
- · Discretionary capital increased to R2,9 billion.

- (1) 2020 comparative information has been restated to correct a hyperinflation accounting error as reported in the Group's interim results announcement of 9 September 2021. Refer to note 36.1 on page 150 of the online Sanlam Annual Financial Statements. The restatement does not have an impact on the net asset value due to the offsetting impacts on foreign currency translation reserve in the statement of changes in
- (2) Weighted average number of shares excludes Sanlam shares held directly or indirectly through consolidated investment funds in policyholder portfolios, as well as Sanlam shares held by the Group's broad-based black economic empowerment special purposes vehicle (B-BBEE SPV) that is consolidated in terms of International Financial Reporting Standards (IFRS). These shares are treated as shares in issue for purposes of adjusted weighted average number of shares in issue, which is the base to determine net result from financial services per share and net operational earnings per share. Diluted headline earnings per share is based on the weighted average number of shares.
- (3) PVNBP = present value of new business premiums and is equal to the present value of new recurring premiums, at the relevant risk discount rate for each business, plus single premiums.
- (4) New covered business margin = value of new covered business as a percentage of PVNBP.
- (5) Growth in Group Equity Value per share (with dividends paid, capital movements and cost of treasury shares acquired reversed) as a percentage of Group Equity Value per share at the beginning of the year.
- (6) Adjusted Return on Group Equity Value equals Return on Group Equity Value excluding investment market and currency volatility, changes in interest rates and other factors outside of management's control.
- (7) The reported Sanlam Group solvency position on 31 December 2020 of 191% has been restated to 186% to reflect the Prudential Authority's revised methodology in the treatment of certain Sanlam Emerging Markets entities in the calculation of Group solvency that was applied retrospectively. The Group also implemented methodology changes on 31 December 2021 for the calculation of Group solvency. The two main changes are the deduction of foreseeable dividends from Group own funds and the adoption of the accounting consolidation methodology for the South African insurance entities.
- (8) Excludes investments in subsidiaries and associated companies, discretionary capital, cash accumulated for dividend payments and the net asset value of non-covered operations.

# on the results

# Introduction

In 2021 the Sanlam Group laid the foundations for future growth by strongly developing our platforms and at the same time delivering a strong performance in a difficult operating environment. We are building on our purpose-led strategy across the Sanlam Group as part of our ongoing sustainability journey to focus on shared value creation, deepening financial inclusion, driving sustainable investment decisions throughout our assets under management, value chains and ecosystems, and optimising value through our strategic partnerships.

Sanlam remains an extremely strong and well capitalised business. In 2021 we were able to use the strength of Sanlam to benefit all stakeholders, particularly those severely impacted by the COVID-19 pandemic. For our clients we paid gross mortality claims of R22 billion (76% higher than 2020), with SLS paying R17 billion and SEM paying R5 billion. Santam made good progress in finalising the open contingent business interruption (CBI) claims. Gross CBI claim payments of R3,2 billion were made to the end of December 2021, inclusive of the relief payments of R1 billion in August 2020, to businesses affected by the pandemic.

The pandemic also impacted our people, who remained resilient through this difficult period. Our sincere condolences go to the families of the 57 colleagues who succumbed to the pandemic since its onset. The Group remains committed to the health and safety of our people, clients and society, including the roll-out of vaccines as the most effective long-term approach to tackling the pandemic. We have implemented a mandatory vaccination policy for our employees to ensure a safe working environment as we transition to hybrid ways of working and continue to provide vaccine access points to the South African public in partnership with AfroCentric

# Strategy implementation progress

We continue to implement our strategy by developing our platform as we work towards building a leading non-banking financial services group in Africa. Our South African operations were strengthened by the development of the Sanlam Investments platform as the leading black-owned asset manager. The proposed merger with Absa Investments will further strengthen our market offering. Substantial net inflows over the period underline the improvement of the investment management platform. The Absa transaction also includes the intended acquisition of Absa's LISP by Sanlam Glacier as well as access to the distribution network of Absa. The intended acquisition of the Alexander Forbes LISP business will further develop the Sanlam Glacier platform.

Our corporate platform will be strengthened through the intended transactions with Alexander Forbes and the launch of a new set of health insurance offerings in partnership with AfroCentric. The intended sale of our standalone retirement fund administration business to Alexander Forbes will enable the Group to focus on providing the leading umbrella pension fund solution and a full range of investment and insurance products to the corporate benefits market. The Alexander Forbes Life transaction is expected to place us in a leading position in group risk underwriting. Our health offering allows us to provide a more holistic product offering to our clients and fulfil a market need for affordable health insurance.

The Group divested from the UK operations outside of asset management, informed by our capital allocation framework and strategic intent to focus on Africa and India. The package of transactions is expected to be completed at an aggregate amount greater than GEV (before write-up to transaction values). We continue to explore the optimisation of our Pan-Africa portfolio through strengthening our position in key markets and exiting sub-scale operations. In India, the Shriram Group will undertake a reorganisation that simplifies the Shriram group structure. As a shareholder in Shriram, Sanlam benefits by reducing one layer between it and the operating entities and allows for focused strategic planning for life and general insurance through the segregation of the credit and the insurance businesses.

We also announced the establishment of an InsurTech strategic alliance with MTN to take the benefits of our insurance and investment products to the African continent's consumers. This will significantly enhance the financial inclusion of consumers that are currently not reached through traditional distribution channels, aimed at helping Sanlam attain its goal of reaching 50 million customers by 2025.

# Operational and financial performance

Economic conditions improved in 2021 from the depressed pandemic-induced base of 2020 in the economies in which we operate. After contracting 6,4% in 2020, South African real GDP increased by an estimated 4,8% in 2021, buoyed by a terms of trade bounce, which underpinned domestic purchasing power and consumer spending. Sub-Saharan Africa real GDP growth recorded an estimated 4% increase, following a contraction of 1,7% in 2020.

This growth recovery combined with altered spending patterns due to the pandemic, supported higher savings rates which had a positive impact on new business volumes in our operations.

Long-term interest rates increased relative to 31 December 2020 in most of the markets in which we operate. Overall economic assumptions changes had a 7% negative impact on VNB and 2,2% negative on GEV.

Equity markets generally recorded higher returns in 2021 relative to 2020 in the countries in which we operate, which benefited asset-based income. Investment return earned on the Group's capital portfolios commensurately improved. The improvement in equity markets supported positive investment variances of 1,5% on GEV.

The average South African rand exchange rate for 2021 strengthened against most of the operating country currencies relative to 2020. The closing rate was however weaker in most markets. The GEV valuations of the non-South African operations were positively impacted by the weaker closing rand exchange rate. However, foreign currency translation losses resulting from the stronger average rand exchange rate over the year had a negative impact on net result from financial services of 5%.

Refer to annexure on page 16 for more detail on equity, interest rate and currency market movements for 2021.

### **Group Equity Value**

Group Equity Value on 31 December

	G	EV	RoGEV	
R million	December 2021	December 2020	GEV earnings	%

Group Equity Value	142 390	131 812	17 208	13,1
Per share (cents)	6 444	5 920	779	13,9

GEV amounted to R142,4 billion or 6 444 cents per share on 31 December 2021. RoGEV per share amounted to 13,9%, including the 2020 final dividend paid of 300 cents per share. RoGEV per share for the covered business was 13,5%, with non-covered business (including discretionary capital and other) at 14,3% per share.

Adjusted RoGEV per share, which excludes the impact of actual investment return higher than long-term assumptions, interest rate changes, other one-off effects not under management control, and currency exchange rate movements, amounted to 14,6%, above the 13,6% target for 2021. The covered business adjusted RoGEV was 13,4% per share and non-covered business (including discretionary capital and other) recorded an adjusted RoGEV per share of 15,5%.

Other	(58)	-	(141)	(0,2%)	83	0,1%
Actual RoGEV	17 208	13,1%	7 490	12,6%	9 718	13,4%
cps		13,9%		13,5%		14,3%

The covered business recorded an adjusted return of 12,6% for 2021. The main components contributing to the return on covered

- · Expected return on covered business reflecting the unwind of the discount rate contributed 9,3%.
- VNB contributed 4,7% due to the healthy growth in new life business volumes and improved margins.
- Operating experience variances contributed negative 4,6% for 2021 mainly due to the impacts of COVID-19 on the following key items:
  - Risk experience was severely impacted by excess mortality due to COVID-19 which resulted in negative experience of R4,2 billion for 2021 relative to negative R125 million in 2020.
  - Persistency experience variances increased from R157 million in 2020 to R712 million for 2021, with improvement from all life businesses in South Africa. This includes the effect of the repricing of group risk business.
  - Maintenance expense experience profits improved to R150 million from R67 million in 2020.
  - Working capital management experience profits declined from R457 million in 2020 to R365 million in 2021, in line with the lower short-term interest rates.
  - The narrowing of credit spreads relative to 2020 resulted in positive credit spread variances of R295 million in 2021 relative to R129 million in 2020.
- Operating assumption changes were positive R1,5 billion (contributing 2,6%) for 2021, relative to negative R2,4 billion in 2020, which was impacted by the COVID-19 related mass lapse assumption change.
  - The Group strengthened the mortality basis across products to allow for the impact of future pandemics while also releasing discretionary reserves to offset excess mortality claims. The total impact of risk assumption changes on embedded value was negative R867 million (2020: positive R438 million). This consisted of a negative impact on value of in-force (net of costs of capital) of R2,1 billion and a positive adjusted net worth impact of R1,2 billion. The negative value of in-force impact includes the reduction in future profits arising from the release of discretionary reserves.
  - Persistency assumption changes contributed R1,5 billion (2020: negative R1,9 billion). Given the strong persistency experience across the business, half of the 5% mass lapse assumption created in 2020, was released, and lapse rate assumptions were also reduced in the SA Retail Affluent risk business. R1,7 billion of the assumption change impacted the value of in-force (net of cost of capital) with a negative impact of almost R200 million on the adjusted net worth.
  - Modelling and other assumption changes (including discretionary reserve releases and required capital modelling) amounted to a positive embedded value impact of R965 million (2020: negative R665 million). A negative amount of R415 million of this impacted the value of in-force (net of costs of capital) with a positive impact of R1,4 billion on the adjusted net worth.

- Investment variances and the expected return on the capital portfolio contributed 3.9% for 2021 reflecting improved market returns over the year.
- · Economic assumption changes had a negative impact of 2,2% due to movements in long-term interest rates over the year.
- The negative 1,1% contribution from foreign currency translation differences and other in 2021 is substantially due to the R595 million revaluation of the UK life business in line with transaction value.

The non-covered operations, discretionary capital and other achieved a return of 13,4% for 2021. This is a combination of a 15,6% return for the non-covered operations and a negative 4,3% for discretionary capital and other. The negative return for discretionary capital and other is mainly due to a partial impairment of the funding to the B-BBEE SPV based on the current Sanlam share price and higher project expenses. The non-covered operations (including discretionary and other capital) achieved an adjusted return of 14,6%.

The main components contributing to the return on non-covered business are:

- · Expected return on non-covered business reflects the unwind of the discount rate over the period.
- · Operating experience variance reflects better than expected investment market performance and net fund flows in the investment businesses, partly offset by lower general insurance premium income in India.
- · Operating assumption changes reflect improved valuations of the Indian credit businesses due to improved listed share price performances and higher valuation of the investment management businesses, including a write-up of the UK wealth and financial planning businesses to transaction value.
- The negative contribution from economic assumption changes is largely due to increases in reference yields.
- · The impact from the currency translation differences is due to a weaker closing rand exchange rate against most of the valuation currencies on 31 December 2021.
- · Santam's underperformance is due to the actual share price underperforming the expected returns.

#### Impact of COVID-19 on mortality experience across the Group

The COVID-19 pandemic had a significant impact on mortality claims across the Group's operations, resulting in a significant increase in excess mortality claims (claims above long-term actuarial assumptions). The Group's South African operations have the largest life insurance exposure and commensurately reflect a much higher value of excess mortality claims. The Group recorded total excess mortality claims of R4,2 billion (net of tax, reinsurance and annuity and disability offsets) on an embedded value basis for 2021.

### Excess mortality claims for the 12 months ended 31 December 2021 (net of tax, reinsurance and annuity and disability offsets)

R million	2021
Sanlam Group	4 197
SLS	3 567
SA Retail Mass SA Retail Affluent Sanlam Corporate	468 656 2 443
SEM	630
SPA Life India Malaysia	583 35 12

### The package of basis changes and repricing offset the impact of excess mortality claims on the operating earnings of SLS.

SLS mortality trends reflected those of the broader South African experience, as published by the South African Medical Research Council. The impact of excess mortality claims was most severe in the second and third waves of COVID-19, in the first and third quarters of 2021. The fourth wave in the final quarter of 2021, had a softer impact on excess mortality claims relative to previous waves.

SLS's corporate business was impacted much more than the retail businesses. The Group believes that the group risk market has been consistently under-pricing premiums for pandemics and is hopeful that more rational pricing will prevail in the market in future.

As part of the annual review of the Group's actuarial basis, SLS implemented a package of basis changes which included further releases of discretionary reserves, positive persistency assumption changes and a strengthening of the mortality basis to allow for future pandemics.

SLS excess mortality claims were offset by a combination of the package of basis changes and the repricing of group risk business.

#### Comments on the results continued

#### SEM holds less discretionary reserves, resulting in a larger excess mortality claims impact on operating earnings.

SEM experienced an increase in mortality claims in the first and third quarters of 2021, with the third quarter impact being more severe than the first quarter. The largest impacts were recorded in the Southern Africa region and in India. Excess mortality claims of R630 million (net of tax, reinsurance and annuity and disability offsets) were recorded for 2021, with R583 million recorded in SPA Life. The overall impact on earnings was partially offset by discretionary reserve releases of R148 million (net of tax). This release together with repricing of group risk business did not fully offset SEM excess mortality claims, leading to a net negative impact of R466 million on operating earnings.

### Shareholders' fund income statement for the 12 months ended 31 December

R million	2021	2020	$\triangle$
Net result from financial services	9 469	8 382	13%
Sanlam Life and Savings	4 806	4 600	4%
Sanlam Emerging Markets	2 227	2 377	(6%)
Sanlam Investment Group	1 298	805	61%
Santam	1 378	686	>100%
Group office and other	(240)	(86)	(>100%)
Net investment return	1 310	271	>100%
Project expenses	(491)	(304)	(62%)
Net operational earnings	10 288	8 349	23%
Amortisation of intangible assets	(738)	(699)	(6%)
Profit on disposal of subsidiaries and associates	229	285	(20%)
Impairments	66	(8 638)	>100%
Net non-operational equity-accounted earnings & other	15	9	67%
Normalised attributable earnings	9 860	(694)	>100%

Net result from financial services increased by 13% (18% in constant currency) in 2021. Net result from financial services is 2% lower than 2019, but 4% higher excluding the impact of one-off gains in 2019 from third-party pool reserve releases in Shriram General Insurance, performance fees earned on the closure of the Climate One fund and higher interest on dividend pool.

SLS net result from financial services increased by 4% relative to 2020. Improved investment market performance over the year supported asset-based income, which was partly offset by higher new business strain and excess mortality claims net of repricing and reserve releases. Excluding the impact of new business strain, excess mortality claims, reserve releases and repricing, net result from financial services increased by 11%.

#### SLS net result from financial services for the 12 months ended 31 December

SA Retail Mass recorded strong performances from the Individual Life and Capitec Bank funeral businesses, however, was significantly impacted by a substantial decline in earnings from the group businesses due to excess mortality claims. The Individual Life and Capitec Bank funeral businesses were less impacted by excess mortality claims and recorded strong earnings growth which was supported by larger in-force books, expense savings, positive investment variances and economic basis changes.

SA Retail Affluent was impacted by the substantial decline in earnings from the risk business due to excess mortality claims. This more than offset higher asset-based fee income from Glacier and the savings business and an improved performance from Sanlam Personal Loans (SPL) due to lower bad debt charges.

Sanlam Corporate was also significantly impacted by excess mortality claims which more than offset higher asset-based fee income from the investment business. The health business continued to record a strong performance driven by the pharmacy and services clusters as well as increased efficiencies.

SEM net result from financial services declined by 6% but was 9% higher in constant currency. SPA GI recorded strong constant currency earnings growth while the Indian insurance operations detracted from growth.

#### SEM net result from financial services for the 12 months ended 31 December

Net result from financial services	2 227	2 377	(6%)	9%

Life insurance was impacted by an increase in COVID-19 related mortality claims across the portfolio. Higher claims in Southern Africa and Tanzania more than offset good growth in North and West Africa which was supported by higher equity and bond markets. India was impacted by higher mortality claims, while Malaysia improved on a constant currency basis.

**General insurance** benefited from a strong improvement in SPA GI due to higher investment return on insurance funds (float) which improved to 11,9% (as a percentage of net earned premiums) from 2,9% in 2020. The Moroccan business reported a float margin of 20,9% on the back of strong equity markets. Further progress was made in transitioning the float investment portfolio to a lower level of equity and property exposure and increased bond exposure. Good value was realised in reducing the equity weighting although it lowered the exposure to the strong equity market performance over the year.

SPA GI recorded a net underwriting margin of 4,4% (2020: 6,1%), below the 5% to 9% target range. The portfolio recorded adverse claims experience in Cote d'Ivore, Continental Re and some of the smaller Eastern and Southern region countries, as well as a weaker performance from the health business. A net insurance margin of 16,3% was achieved for 2021 relative to 9,0% in 2020.

#### (A) // Financial, strategic and operational review

#### Comments on the results continued

In India, Shriram General Insurance's (SGI) earnings were impacted by the lack of regulated premium increases on third-party business for the past two years and limited ability to finalise claims due to courts in India continuing to operate at limited capacity, which impacts the ability to finalise claims. SGI's net insurance result however remained satisfactory at 25,2% of net earned premiums. The Malaysian general insurance operations recorded higher earnings largely driven by a lower claims ratio.

The investment management portfolio benefited from higher asset-based fees due to the increase in assets under management driven by strong recent net inflows in Botswana, Namibia and Kenya.

Credit and structuring benefited from increased disbursements and collections in India and lower bad debt provisions in the SPA Southern Africa region. Both Letshego and Capricorn Namibia contributed to the improved performance in SPA.

SIG's contribution to net result from financial services increased by 61% largely due to marked-to-market gains on local and offshore listed bonds at SanFin and higher asset-based fees from the improved investment market performance.

#### SIG net result from financial services for the 12 months ended 31 December

R million	2021	2020	$\triangle$

Sanlam Specialised Finance	631	241	>100%
Gross result from financial services Tax on gross result from financial services Non-controlling interest	1 848	1 249	48%
	(427)	(378)	(13%)
	(123)	(66)	(86%)
Net result from financial services	1 298	805	61%

Sanlam Investments increase is primarily due to higher asset-based fees which was partly offset by lower performance fees in 2021. Excluding performance fees, gross result from financial services was up 14%. The Wealth Management business was supported by performance fee income, higher average assets under management and increased income from diversification initiatives. International was supported by an improved performance from Sanlam UK.

SanFin benefitted from marked-to-market gains on local and offshore listed bonds as spreads narrowed further relative to 31 December 2020. The preference shares and equity businesses also recorded improved performances while lower credit loss provisions were raised relative to the prior period.

Santam recorded strong operating results for 2021 with the net result from financial services more than doubling relative to 2020. The conventional business recorded a net underwriting margin of 8,0% (2020: 2,5%) of net earned premiums. Santam reviewed its provisions for CBI claims at year-end which resulted in the release of R450 million (R279 million Sanlam's share) from the net provision, contributing approximately 1,7% to the net underwriting margin. Shareholders are referred to Santam's annual results released on 2 March 2022 for more information on its performance.

#### Net operational earnings

Net operational earnings of R10,3 billion increased by 23%, the combined effect of the 13% increase in net result from financial services and a positive net investment return of R1,3 billion relative to R271 million in 2020. The prior period investment return included a net R726 million expected credit loss provision in Lebanon. Net investment return on capital benefited from the improvement in equity markets over the period but was also impacted by lower dividend income and interest earned on cash balances due to lower interest rates. Project expenses were 62% higher than 2020 largely due to the increased spend on initiatives supporting execution of the Group's strategy, including corporate transactions over the year.

#### Normalised attributable earnings

Normalised attributable earnings improved from a loss of R694 million in 2020 to a profit of R9,9 billion for 2021. The 2020 year included impairments of R8,6 billion due to the lower valuation of the Shriram and former Saham operations. In 2021 a net impairment reversal of R66 million was recognised, largely due to the reversal of R672 million in respect of Shriram Capital as a result of a recovery of the listed share prices, partly offset by the impairment of goodwill of R356 million in respect of Sanlam Life and Pensions UK (SLP) and R145 million in respect of the B-BBEE SPV.

#### Headline earnings and diluted headline earnings

Headline earnings and diluted headline earnings per share increased by 27%. The difference in growth between normalised attributable earnings and headline earnings relates primarily to the exclusion of impairments, impairment reversals and the inclusion of fund transfers<sup>1</sup> of negative R387 million (2020: positive R1,4 billion) in headline earnings.

#### New business volumes and net fund inflows

- · non-economic mismatch profits and losses recognised in terms of IFRS through the elimination of Sanlam shares held in policyholder portfolios as treasury shares (negative R5 million, 2020: positive R515 million);
- the recognition of deferred tax assets in respect of assessed losses in policyholder portfolios (R124 million, 2020: R176 million);
- the consolidation of the B-BBEE SPV which results in the recognition of interest paid on funding in the SPV, marked-to-market changes on the hedging instruments in the structure and administration costs incurred by the SPV (negative R600 million, 2020: negative R14 million);
- the impact of hyperinflation on the opening balance of monetary assets and liabilities (2020: negative R940 million); and
- the elimination of B-BBEE SPV impairments (R145 million, 2020: R1 673 million).

### Comments on the results continued

Overall new business volumes at **\$L\$** were 40% higher than 2020 with robust performances from all businesses over the year.

SA Retail Mass recorded strong new business sales supported by improved agent productivity and increased use of digital tools. The Individual Life business recorded growth of 39%, group business sales increased by 81% and the Capitec Bank funeral business sales increased by 48%.

SA Retail Affluent achieved substantial new business sales growth driven by Glacier life and investment business. Recurring premium risk sales growth was more muted as improved growth from the individual life, Sanlam Indie and MiWay Life businesses, were partially offset by weaker sales of assistance and group risk business in BrightRock; and marginally lower credit life sales from SPL. Individual risk sales from traditional intermediated channels (including BrightRock) increased by 10% on 2020.

Sanlam Corporate's new business volume growth was driven by single premium investment and recurring premium life business. Quote activity in this segment has recovered to pre-pandemic levels but conversion rates remain lower.

SEM recorded overall new business growth of 4% (13% in constant currency) driven by strong volume growth in the life insurance businesses.

#### SEM new business volumes for the 12 months ended 31 December

R million	2021	2020	$\triangle$	Constant currency △

Life insurance new business volume growth was supported by all regions. In SPA Life, Namibia recorded strong annuity sales and Botswana recorded improved individual life and bancassurance volumes which boosted growth in the Southern Africa region. A strong performance from the North and West Africa region was driven by group life and agency volumes in Morocco and growth in the CIMA region across business lines. In East Africa volume growth was largely due to improved sales of group business in Kenya and credit life volumes in Tanzania. Strong contributions from both India and Malaysia were mainly as a result of diversification in distribution channels.

Asset management new business grew off a high base from 2020 as further large mandates were awarded in Botswana, Namibia and Kenya.

**General insurance** new business volumes reflect improved constant currency growth from SPA but a weaker performance in India. SPA GI growth was driven by higher volumes in the motor and health business lines in Morocco and an improved performance from Continental Re. Weaker sales in the assistance business and the cancellation of loss-making health business in Cote d'Ivore detracted from volume growth. Focus remains on protecting the quality of the health book. India new business volumes declined due to the lack of premium increases on third-party business as regulated by government and lower volumes from the credit businesses during the COVID-19 related lockdown periods. Malaysia volumes decreased in constant currency due to lower sales through agency channels as the businesses shifted focus to direct channels.

Net fund inflows at **SIG** improved by 56% to R33 billion, while new business volumes were 6% higher than 2020. Net fund inflows more than doubled in Sanlam Investments, with strong recoveries in both retail and institutional funds. Satrix, Sanlam Multi-Manager and the Retail Implemented Consulting initiative all performed well. Wealth Management and International net inflows were lower than 2020.

Santam achieved satisfactory gross written premium growth of 5% in the conventional insurance business. The Santam Commercial and Personal intermediated business reported low growth for the year, however, various growth initiatives are showing positive results, which should assist future growth. The Santam Specialist business achieved improved growth during the second half of 2021. MiWay achieved impressive growth of 9% in the current operating environment. Gross written premiums from outside South Africa grew by 6% and strong growth was achieved by Santam Re.

Group net fund inflows of R78,3 billion were 27% higher than 2020 (up 32% in constant currency) and 38% higher than 2019, despite the large mortality-related outflows in SLS. The significant improvement in net inflows at Sanlam Glacier and Sanlam Investments were key drivers of the improvement. SEM also contributed strongly compared to 2019.

### Value of new covered business

**Net VNB** recorded strong improvements across the portfolio, with all businesses above 2019 levels. In SLS the Retail Mass VNB increased by 60%, Retail Affluent increased by 16% and Corporate VNB more than doubled. In SEM strong improvements in VNB were reported across the Pan-Africa portfolio as well as in India and Malaysia. SEM VNB increased 87% and up 115% in constant

The Group covered business net VNB margin was higher than 2020 and slightly below 2019.

# Capital and solvency

The capital and solvency position of the Group and its main operating entities remained strong and within target ranges on 31 December 2021. The solvency cover ratio of Sanlam Life covered business was 178% (31 December 2020: 197%), the solvency position of Sanlam Life solo was 214% (31 December 2020: 257%) and the Group solvency cover ratio was 173% (31 December 2020: 186%).

The reported Sanlam Group solvency position on 31 December 2020 of 191% has been restated to 186% to reflect the Prudential Authority's revised methodology in the treatment of certain Sanlam Emerging Markets entities in the calculation of Group solvency that was applied retrospectively.

The reduction in the Group solvency cover ratio from 186% to 173% is attributable to the annual dividend payment, higher prescribed equity stresses and negative experience variances and assumptions changes that were partially offset by the positive impact from net unwind of in-force business, operating profits and value of new business.

The Group implemented methodology changes on 31 December 2021 for the calculation of Group solvency. The two main changes are the deduction of foreseeable dividends from Group own funds and the adoption of the accounting consolidation methodology for the South African insurance entities.

The Group solvency ratio reduced further after allowing for the deduction for foreseeable dividends from the eligible own funds on 31 December 2021. Previously the published ratio did not allow for a deduction for foreseeable dividends from the eligible own funds. This reduction was partially offset by other methodology changes including the adoption of the accounting consolidation method, for the South African insurance entities, in the calculation of Group solvency.

#### (A) // Financial, strategic and operational review

### Comments on the results continued

The Sanlam Life covered ratio also reduced for the same reasons as the Group ratio except for the annual dividend payment which is excluded from own funds for Life Covered business.

Discretionary capital increased from R636 million on 31 December 2020 to R2,9 billion on 31 December 2021. The increase is largely due to the net proceeds received from the sale of Nucleus Financial Group plc of some R1,2 billion and a release of capital from operations of R1,0 billion.

The conditions precedent relating to the proposed acquisition by SAN JV (RF) of an additional 22,8% in Saham Assurance Maroc, were not fulfilled. The proposed transaction accordingly lapsed. SAN JV's shareholding in Saham Assurance Maroc remains at 61.7%.

In September 2021 we announced the proposed sale of Sanlam UK's 100% shareholding in Sanlam Life and Pensions, Sanlam Private Investments and Sanlam Wealth Planning. The total net consideration for the transactions is £153 million. The transactions are subject to regulatory approval and are expected to close in the first half of 2022. These transactions will add to discretionary capital in 2022.

The Group has historically maintained discretionary capital of around R1,0 billion in normal circumstances in order to fund small and opportunistic acquisitions. However, the continuing uncertainty posed by the COVID-19 pandemic and the reduced discretionary reserves following the 2021 release of some of these reserves, has resulted in a change in the target level of our discretionary capital buffer.

The Group intends to hold a significantly higher discretionary buffer during the course of 2022, and, if necessary, for longer to provide protection against any further significant COVID-19 waves that may negatively impact mortality experience despite the premium increases implemented in respect of group risk business. The Board will actively monitor the position and may review this situation if it appears that the higher discretionary capital is not required. The Group's normal capital allocation policy will guide the use of such surplus capital.

Sanlam Life redeemed a tranche of R1 billion subordinated debt notes (SLI4) on the first call maturity date on 16 August 2021. Sanlam Life issued new subordinated debt notes (SLI5, SLI6 and SLI7) totalling R2 billion on 16 August 2021. The new notes were assigned a credit rating of zaA+ by S&P Global Ratings.

# Governance, people and culture

Governance, people and culture are important areas that the Group continues to focus on. Three new independent Board members were appointed in 2021, bringing the Board to a majority of independent directors. New CEOs for Sanlam Investment Group and Santam were appointed and the Group's Chief Information Officer was appointed to the Group Executive Committee. These appointments underline Sanlam's commitment to sound corporate governance while ensuring an appropriate mix of skills, experience and corporate memory on our Board and Executive Committee.

We extend our gratitude and well wishes to Dr Rejoice Simelane, who retired from the Sanlam Board in March 2022. Dr Simelane has served the Sanlam Group, contributing to its growth and transformation, for the past 18 years, especially as an active member of the Social, Ethics and Sustainability committee.

The Group regrets to announce that Mr Jurie Strydom, current Chief Executive Officer (CEO) of the Sanlam Life and Savings cluster, has decided to step down from his role and will be leaving Sanlam at the end of June 2022. Jurie has been with the Group since 2016, previously as CEO of Sanlam Personal Finance. Under his leadership these clusters have achieved marketleading results and competitive positionings, most recently through the COVID-19 pandemic. Details regarding the appointment of a successor will be announced in due course.

Sanlam's culture journey, "Winning as One" signals our commitment to collaboration and leveraging synergies in supporting strategy execution. Our investment in developing our people and the culture journey brings leadership to life, involving employees in crafting solutions, being intentional about what we do and how we do things. We used an internationally recognised framework and methodology to understand and measure the Sanlam culture. Sanlam's culture score improved in 2021 and was significantly higher than the industry average. This will support our ambitions to drive a new phase of growth for the Group as we transform into a future-fit business.

As part of Sanlam's data security, to ensure sound data security practices are implemented, the information and data policy was refined and approved by the Sanlam Board. Data governance teams, and data stewardship are fully operational, looking at aspects such as data privacy and security. With POPIA coming into effect in 2021, Sanlam Group Technology has embedded the data privacy management capabilities. On the technical front, data protection and leakage prevention, and data activity monitoring continue to be deployed and provide increased levels of data security.

# Outlook

The economies in Africa continue to recover from the economic damage caused by the pandemic. Despite this continued growth and recovery, the penetration of insurance and savings remains low across the continent. Sanlam is well-positioned to capture this growth opportunity by leveraging the reach of our broad platform and partnership model to drive financial inclusion through providing simple products, at scale, using increased digital capabilities.

The impact of the pandemic will however persist, and we believe there will be further waves of infection. The relevant local vaccination programmes will affect the impact that future waves have on mortality experience. COVID-19 will eventually become endemic, and vaccination will constitute the most significant means of controlling the disease.

As previously indicated, the Group expects to retain modest discretionary reserves to mitigate any mortality losses after 2021. The Group has implemented management actions, including risk-based repricing of all group schemes, redesign of retail risk products, implementation of new underwriting protocols and strengthening of the mortality basis. It however remains difficult to accurately forecast the extent and timing of future waves and their impact. These management actions are therefore likely to remain in place for the foreseeable future.

In addition to the management actions, the Group will maintain a higher level of discretionary capital than is normal for a period of time, to provide a buffer should the management actions taken prove to be inadequate. The Group will target a minimum of R3 billion of discretionary capital, which may be used to mitigate the impact of any unexpected COVID-19 mortality experience.

Our digital transformation journey has progressed well in 2021. We empowered our agents through digital tools which supported improved productivity, developed our portfolio of digital platforms further and enhanced our client experience. Sanlam will build on these foundations as we continue to modernise our business and invest in new capabilities, partnerships and assets to build disruptive, trusted platforms and ecosystems through scalable technology.

The Group's new business volumes are at elevated levels and have benefited from an increase in savings rates due to our clients response to the pandemic. As behaviour normalises and short-term interest rates gradually increase, new business growth rates are likely to moderate. We therefore do not expect the new business growth rates of 2021 to persist in 2022. Sanlam is however well-positioned to retain our strong market positioning and the gains attained in 2021.

The gains in equity markets in 2021 also had a positive impact on our South Africa and Africa operations. The SPA GI business recorded strong earnings growth due to higher float income. We expect a more normalised performance from equity markets in 2022 and therefore do not expect a repeat of these gains in 2022.

# Dividends

Sanlam's dividend policy is based on cash operating earnings, which is equal to the portion of the business clusters reported operating earnings that are distributed to the Group as cash dividends. The level of cash earnings available for distribution to the Group is informed by several factors, including working capital requirements, as well as the solvency position of the various entities within a cluster. The key principle is that the entities within a cluster should be sufficiently capitalised after a dividend distribution to ensure compliance with internal risk appetites and local regulatory solvency requirements, taking cognisance of future growth plans. The same considerations apply in setting the Sanlam dividend, taking due cognisance of the Group solvency position under the South African regulations.

The dividend policy continues to align with the guidance issued by the Prudential Authority. At a secondary level, the Group's objective is to maintain a 1.0x - 1.2x times Group cash operating earnings cover in any year to manage a smooth dividend profile.

Sanlam Limited was able to declare a dividend of 334 cps (2020: 300 cps) within its normal dividend policy range without having significant impact on the ability of the Group to deal with further financial stresses. Furthermore, the Group's solvency position remains strong at 173% on 31 December 2021.

The declaration of a dividend by Sanlam reflects the continued resilience of the Group and the Board's confidence in the underlying strength of the business.

Shareholders are advised that a final gross cash dividend of 334 cents per share was declared for the year ended 31 December 2021, an increase of 11% on the prior year dividend. The dividend is payable on Monday, 11 April 2022 by way of electronic bank transfers to ordinary shareholders recorded in the register of Sanlam at close of business on Friday, 8 April 2022. The last date to trade to qualify for this dividend will be Tuesday, 5 April 2022, and Sanlam shares will trade ex-dividend from Wednesday, 6 April 2022. Share certificates may not be dematerialised or rematerialised between Wednesday, 6 April 2022 and Friday, 8 April 2022, both days included. Shareholders who have not yet provided their banking details for dividend payments are requested to do so by contacting Sanlam's transfer secretary, Computershare, at 0861 100 913 or +27 (0)11 370 5000.

The South African dividend withholding tax regime applies in respect of this dividend. The dividend in full will be subject to the 20% withholding tax, where applicable, which results in a net dividend, to the shareholders who are not exempt from paying dividend tax, of 267,2 cents per share. The number of ordinary shares in issue in the company's share capital as at the date of the declaration is 2 049 418 848 excluding treasury shares of 177 555 560. The company's tax reference number is 9536/346/84/5.

<sup>(1)</sup> The release of discretionary reserves against excess risk claims experience is reported under SA Retail Affluent in the income statement but shown separately in the detailed information as reported in note 7.1.

<sup>(2) 2020</sup> comparative information has been restated to correct a hyperinflation accounting error as reported in the Group's interim results announcement of 9 September 2021. Refer to note 36.1 on page 150 of the online Sanlam Annual Financial Statements.

<sup>(1)</sup> The full yield curve was used to calculate the 2021 VNB of Retail Affluent's core individual risk product (Matrix), in order to ensure a better reflection of the economic value added given the large changes in the yield curve over the year. The impact of the change on the 2021 group VNB is not material.

# 4 Economic assumptions - covered business (continued)

### Illiquidity premiums

Free Surplus

Adjusted net asset value

Investment returns on non-participating and inflation-linked annuities, as well as guarantee plans include assumed illiquidity premiums due to matching assets being held to maturity.

Assumed illiquidity premiums for 2021 and 2020 generally range between 25bps and 70bps for non-participating annuities, between 25bps and 75bps for inflation-linked annuities and capped at 120bps (2020: 120bps) reflecting both illiquidity premiums and credit risk premium for guarantee plans.

Equity participation costs	1	1
Operational earnings	10 288	8 349
Adjusted number of shares (million):		
Weighted average number of shares for diluted earnings per share (refer note 23 on		
page 120 of the online Sanlam Annual Financial Statements)	2 087,8	2 087,8
Add: Weighted average Sanlam shares held by policyholders and B-BBEE SPV	136,2	138,9
Adjusted weighted average number of shares for normalised diluted earnings per share	2 224,0	2 226,7

<sup>(1) 2020</sup> comparative information has been restated to correct a hyperinflation accounting error as reported in the Group's interim results announcement of 9 September 2021. Refer to note 36.1 on page 150 of the online Sanlam Annual Financial Statements.

# 14 Value per share

	2021	2020
Net asset value per share is calculated on the Group shareholders' fund at net asset value. Equity value per share is calculated based on the Group Equity Value.	R million 75 928 142 390	R million 71 468 131 812
Number of shares for value per share  Number of ordinary shares in issue  Shares held by subsidiaries in shareholders' fund  Outstanding shares in respect of Sanlam Limited long-term incentive schemes	Million 2 226,9 (43,0) 25,7	Million 2 226,9 (26,2) 25,8
Adjusted number of shares for value per share	2 209,6	2 226,5

# 15 Present value of holding company expenses

The present value of holding company expenses has been calculated by applying a multiple of 8.2 (2020: 8.1) to the after tax recurring corporate expenses.

# 16 Shares repurchased and cancelled

Sanlam shareholders granted general authorities to the Group at the 2021 and 2020 annual general meetings to repurchase Sanlam shares in the market. The Group acquired 17 million Sanlam Limited shares acquired at zero value as a result of qualifying Sanlam Life Insurance Limited's policyholders who became shareholders on demutualisation forfeiting their rights due to being untraceable.

# Shareholders' diary

Financial year-end	31 Decembe
Annual general meeting	8 June 2022

### **REPORTS**

Interim report for 30 June 2022	8 September 2022
Announcement of the results for the year ended 31 December 2022	9 March 2023
Integrated Report for the year ended 31 December 2022	31 March 2023

#### **DIVIDENDS**

DIVIDENDS	
Dividend for 2021 declared	10 March 2022
Last date to trade for 2021 dividend	5 April 2022
Shares will trade ex-dividend from	6 April 2022
Record date for 2021 dividend	8 April 2022
Payment of dividend for 2021	11 April 2022
Declaration of dividend for 2022	March 2023
Payment of dividend for 2022	April 2023

To allow for the dividend calculation, Sanlam's share register (including Sanlam's two nominee companies, namely Sanlam Share Account Nominee (Pty) Ltd and Sanlam Fundshares Nominee (Pty) Ltd), will be closed for all transfers, off-market transactions and dematerialisations or rematerialisations between Wednesday, 6 April 2022 and Friday, 8 April 2022, both dates included.

Transactions on the JSE via Strate are not affected by this arrangement.

<sup>(2)</sup> Non-current assets include property and equipment, right-of-use assets, owner-occupied properties, goodwill, value of business acquired, other intangible assets, non-current assets held for sale and deferred acquisition costs.

<sup>(3)</sup> Includes R11 billion Goodwill recognised on consolidation of Saham.

<sup>(4) 2020</sup> comparative information has been restated to correct a hyperinflation accounting error as reported in the Group's interim results announcement of 9 September 2021. Refer to note 36.1 on page 150 of the online Sanlam Annual Financial Statements.
