## Investment growth since inception

Annualised returns (%)	Fund	Benchmark
Since inception	16.01	14.79
5 Year	N/A	N/A
3 Year	14.76	10.97
1 Year	15.13	9.14
Year to date	8.39	5.75
Highest annual return	38.22	35.96
Lowest annual return	1.07	-2.86

An annualised rate of return is the average rate of return per year, measured over a period either longer or shorter than one year, such as a month, or two years, annualised for comparison with a one-year return. The highest and lowest 12 month returns are based on a 12 month rolling period over 10 years or since inception where the performance history does not exist for 10 years.

Risk statistics since inception (%)	Current	Maximum	Mandate*
One Month Value at Risk (VaR) at 99%	13.5%	14.2%	20%
Liquidity (Average Days to Trade)	0.0	0.0	30.0

Total exposure and leverage is calculated using the VaR approach. VAR represents the statistical loss that the Fund can experience given its current holdings over a one Month period with a 1% probability. Portfolio stress testing is performed by subjecting a portfolio through extreme market situations, and noting the portfolio profit and loss, value at risk and exposure movements. Risk Monitoring Specialist: Risk Café.

**Disclaimer:**

Sanlam Collective Investments (RF) Pty Ltd ("SCI") is a registered and approved Manager in Collective Investment Schemes in Securities and is a member company of the Sanlam Group. The Sanlam Group is a full member of the Association for Savings and Investment SA. The information contained in this MDD does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act, and should be read in conjunction with the Upfront Disclosure Document. Use of or reliance on this information is at own risk. Independent professional financial advice should be sought before making an investment decision. Collective investment schemes are generally medium-to-long-term investments. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. This fund has no Initial Fees. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign instruments which could be accompanied by additional risks as well as potential limitations on the availability of market information. The Manager has the right to close any portfolios to new investors to manage the fund more efficiently in accordance with their mandates. The Manager retains full legal responsibility for the third-party named portfolio. The portfolio management of all the portfolios is out sourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value ("NAV") basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Please note that past performance is not necessarily a guide to future performance, and that the value of participatory interests / units in investments / unit trusts may go down as well as up.

While CIS in hedge funds differ from CIS in securities (long-only portfolios) the two may appear similar, as both are structured in the same way and are subject to the same regulatory requirements. The ability of a portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. A manager may, in exceptional circumstances, suspend repurchases for a period, subject to regulatory approval, to await liquidity and the manager must keep the investors informed about these circumstances. Further risks associated with hedge funds include: investment strategies may be inherently risky; leverage usually means higher volatility; short-selling can lead to significant losses; unlisted instruments might be valued incorrectly; fixed income instruments may be low-grade; exchange rates could turn against the fund; other complex investments might be misunderstood; the client may be caught in a liquidity squeeze; the prime broker or custodian may default; regulations could change; past performance might be theoretical; or the manager may be conflicted. A schedule of fees and charges and maximum commissions is available from the Manager, SCI. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge on the SCI website ([www.sanlamcollectiveinvestments.com](http://www.sanlamcollectiveinvestments.com)).
