

Blue Ink

Sanlam Collective Investments
Yield Trading
Qualified Fund of Hedge Fund

AS AT 31 January 2019

the fund's intent

The Blue Ink Sanlam Collective Investments Yield Trading Fund of Hedge Fund is suitable for the qualified investor seeking return opportunities within the fixed income market.

- While we look to provide superior long-term absolute returns relative to the South African ILBI (Inflation-Linked Bond Index), the return experience significantly diversifies from traditional peers.
- This is achieved through index allocation that replicates the risk of the ILBI.
- Together with this, we identify and invest in credible South African hedge fund managers who seek superior long-term absolute returns across different market regimes within regulated hedge funds.
- The fund will have exposure to liquid assets including money market and cash equivalent instruments, listed and unlisted interest rate instruments, bonds, listed as well as unlisted financial instruments inclusive of foreign exchange instruments and interest rate derivatives as permitted by legislation.
- This fund is also suitable for an investor with a moderate to aggressive risk-reward profile and for inclusion in a balanced portfolio. It may provide meaningful diversification and reduction of overall portfolio risk.

what we believe

- We are ultimately undergoing a talent search
There exists a niche group of investment talent that have individually proven to be successful in wealth creation through non-habitual investment approaches.
Our core skill is to identify this talent and extract it for the benefit of the fund's investment purpose.
- To calibrate for risk is to calibrate for opportunities
It is our belief that when combining different strategies, there are risks one cannot control and those opportunities that we can successfully manage. Managing the latter is at the core of Blue Ink's investment philosophy.
- The degrees of freedom are essential
The ability to deliver investment returns agnostic to markets conditions, requires a significant increase in the investment toolkit.

what we endeavour to achieve

- Consistent alpha over 5 years agnostic to general capital markets.
- Exposure to diversified strategies with the ability to be rewarded in upward and downward trending markets.
- Single point of access to a range of established and proven hedge fund managers.

Definitions

Alpha: Described as the outperformance or excess return over the benchmark.

Best annual return: The actual annual highest return of the fund since its inception.

Compound growth rate: Average annual return achieved by the fund since its inception.

Derivative: A security with a price that is dependent upon or derived from an underlying asset.

Fees/Total Expense ratios: Percentage amount of loss an investment could potentially experience, over a given period of time, with given likelihood.

Least annual return: The actual annual lowest return of the fund since its inception.

Liquidity Risk Profile: The average number of days needed to liquidate the portfolio.

Maximum drawdown: Greatest recorded percentage loss of the fund when the market is experiencing significant new declines.

Maximum gain: Greatest recorded percentage gain of the fund when the market is experiencing significant new gains.

VaR: A measure of a maximum expected loss of a portfolio at a given confidence level over a specified time period.

Volatility: Measure of how much the value of an investment is expected to fluctuate over the investment period.

Fees/Total Expense ratios (excl. VAT)

A1 Class	Manager (%)	Performance (%)
Parties		
Blue Ink	1.00	15
Sanlam Collective Investment	0.20	-
Total Expense Ratio	5.32	0.47

Period of TER calculation | 01 November 2016 to 30 September 2018. The TER will be higher than the quoted service charge of the manager.

Total Expense Ratio (TER) | 5.32% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) | 0.11% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 5.43% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

administered by

Additional Information: Sanlam Collective Investments (RF) Pty Ltd ("SCI") is a registered and approved Manager in Collective Investment Schemes in Securities and is a member company of the Sanlam Group. The Sanlam Group is a full member of the Association for Savings and Investment SA. The management of investments are outsourced to the authorised Financial Services Provider ("FSP") as stated in this Minimum Disclosure Document ("MDD"). The information contained in this MDD does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act, and should be read in conjunction with the Upfront Disclosure Document. Use of or reliance on this information is at own risk. Independent professional financial advice should be sought before making an investment decision. Collective investment schemes are generally medium- to long-term investments. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign instruments which could be accompanied by additional risks as well as potential limitations on the availability of market information. Portfolio stress testing is performed by subjecting a portfolio through extreme market situations, and noting the portfolio profit and loss, value at risk and exposure movements. There is no re-hypothecation or encumbering of assets in this fund. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The Manager retains full legal responsibility for the third-party named portfolio. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value ("NAV") basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. A fund of fund unit trust only invests in other unit trust, which levy their own charges, which could result in higher fee structures for these funds. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. Please note that past performance is not necessarily a guide to future performance, and that the value of participatory interests/units in investments/unit trusts may go down as well as up. The promulgation of hedge fund regulations in 2015 prompted the launch of this fund on the stated launch date. As a result, the returns of the fund prior to the launch date are presented as either simulated or actual returns based on past experience in pre-regulated structures. Where referenced, annualised returns describe the average amount of money earned by an investment each year over a given time period. A schedule of fees and charges and maximum commissions is available from the Manager, SCI. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge on the SCI website (www.sanlamcollectiveinvestments.com) or the Blue Ink Investments website (www.blueink.co.za).
