**Fund Description**

The fund aims to closely match movements in its benchmark index, the SALI Real. The SALI Real index captures the changes in real interest rates and therefore tracks the changes in the cost of purchasing an inflation-linked annuity. The fund therefore aims to preserve a member’s ability to purchase an inflation-linked annuity.

**Fund Information**

- **Inception Date**: 01-May-2013
- **Fund size**: R8 million
- **Portfolio Manager**: Sanlam Investments
- **Legal Structure**: Pooled Life Policy

**Benchmark**

SALI stands for Sanlam Asset Liability Index. In the same way the All Share Index (ALSI) tracks the change in value of the stocks on the Johannesburg Stock Exchange over time, so SALI tracks the change in the cost of purchasing an annuity.

Real refers to inflation linked. Members, who want to maintain their standard of living in retirement, should consider buying an annuity that protects them against increases in the cost of living i.e. inflation. An inflation linked annuity is guaranteed to provide increases equal to inflation.

The SALI Real has been developed by Sanlam to track the cost of purchasing an inflation linked annuity.

As real interest rates move up (and down) and the cost of an inflation linked annuity decreases (or increases), so the index will change to reflect this change in

**Duration Distribution**

The TER was incurred as expenses relating to the administration of the Financial Product. The TC was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. The TIC was incurred as costs relating to the investment of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER’s.

The TER shown above is based on the highest fee tier where applicable and is calculated as at 31 March 2020.
