Fund Description
The fund protects investors against short-term volatility by smoothing out investment returns while providing valuable guarantees on benefit payments (death, disability, resignation, retrenchment and retirement). The underlying portfolio is based on less risk assets than a typical balanced fund. Full vesting bonuses, which cannot be negative, are declared monthly in advance.

The TER was incurred as expenses relating to the administration of the Financial Product. The TC was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. The TIC was incurred as costs relating to the investment of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.

The TER shown above is based on the highest fee tier where applicable and is calculated as at 31 March 2020. Inclusive of the TER of 2.096%, a guarantee premium of 1.6% and a performance fee of 0.010% were recovered.
