

Fund Objective

This fund aims to generate capital growth over the long term and generate income at moderate levels of volatility in portfolio values. This portfolio will have moderately conservative (cautious) risk qualities, reducing the probability of capital loss, therefore an investment horizon of at least 3 - 5 years is recommended.

Fund Strategy

This is an actively-managed, low equity fund which invests in a combination of local equities, bonds, money market instruments, listed property, as well as offshore equities and fixed-interest investments. The portfolio will also be allowed to invest in listed and unlisted financial instruments (derivatives) as allowed by the Act from time to time. Capital stability is achieved through the diversification across a variety of high yielding assets. The fund is Regulation 28 compliant and is limited to 40% equities.

Why choose this fund?

- The fund offers a high quality, well-diversified portfolio of collective investment schemes at a reasonable cost.
- It is appropriate for investors looking for a stable income and capital growth, but at moderate levels of capital volatility.
- The fund is Regulation 28 compliant.

Fund Information

ASISA Fund Classification	SA Multi Asset Low Equity
Risk Profile	Cautious
Benchmark	CPI+3%
Fee Class Launch date	10 November 2016
Portfolio Launch date	21 January 2016
Minimum investment	Lump sum: R10 000 Monthly: R500
Portfolio Size	R 766 million
Bi-annual Distributions	31/12/23: 22.83 cents per unit 30/06/23: 28.70 cents per unit
Income decl. dates	30/06 31/12
Income price dates	1st working day in January and July
Portfolio valuation time	17:00
Transaction cut off time	15:00
Daily price information	www.sanlamunitrusts.co.za
Repurchase period	2 to 3 working days

Fees (Incl. VAT)	A1-Class (%)
Advice initial fee	Neg.*
Manager initial fee (max.)	0.00
Advice annual fee	Neg.*
Manager annual fee (max.)	1.09
Total Expense Ratio (TER)	1.96

* Advice fee | Any advice fee is negotiable between the client and their financial advisor. An annual advice fee negotiated is paid via a repurchase of units from the investor.

* This fund is also available via certain LISPS (Linked Investment Services Providers), who levy their own fees.

Obtain a personalised cost estimate before investing by visiting www.sanlamunitrustsmdd.co.za and using our Effective Annual Cost (EAC) calculator. Alternatively, contact us at 0860 100 266.

PERIOD: 01 January 2021 to 31 December 2023

Total Expense Ratio (TER) | 1.96% of the value of the Financial Product was incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction Cost (TC) | 0.15% of the value of the Financial Product was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction Costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. It should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER.

Total Investment Charges (TER + TC) | 2.11% of the value of the Financial Product was incurred as costs relating to the investment of the Financial Product.

A fund of fund unit trust only invests in other unit trusts, which levy their own charges, which could result in a higher fee structure for these funds. The fund manager may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down.

Fund Composition

Securities (%)	29-Feb
Ninety One Cautious Managed	17.4

Sanlam Collective Investments (SCI*)

Performance (Annualised) as at 29 Feb 2024 on a rolling monthly basis*

A1-Class	Fund (%)	Benchmark (%)
1 Year	7.25	8.56
3 Year	7.56	9.08
5 Year	7.55	8.14
Since inception	7.06	7.95

An annualised rate of return is the average rate of return per year, measured over a period either longer or shorter than one year, such as a month, or two years, annualised for comparison with a one-year return.

Performance (Cumulative) as at 29 Feb 2024 on a rolling monthly basis*

A1-Class	Fund (%)	Benchmark (%)
1 Year	7.25	8.56
3 Year	24.43	29.80
5 Year	43.91	47.90
Since inception	64.54	75.19

Cumulative return is the aggregate return of the portfolio for a specified period.

Risk statistics: 3 years to 29 Feb 2024

Std Deviation (Ann)	4.81
Sharpe Ratio (Ann)	0.33

Actual highest and lowest annual returns*

Highest Annual %	17.65
Lowest Annual %	-2.99

*The highest and lowest 12 month returns are based on a 12 month rolling period over 10 years or since inception where the performance history does not exist for 10 years.

Portfolio Detail

Portfolio Manager(s) Comment

Both the UK and Japan moved into a technical recession in Q4 2023 after posting two consecutive quarters of negative economic growth. UK Prime Minister Rushi Sunak is under pressure to find ways to stimulate the UK economy and address the country's cost of living crisis. Japan battled with high economic uncertainty and inflation, which weighed heavily on private consumption and foreign investment.

US inflation rose more than expected in January because of stubbornly high shelter prices which impacted consumers. A preliminary Reuters poll showed that China's manufacturing activity contracted in February as factory owners struggled to secure local and international orders. Eurozone business activity fell for the ninth month in a row, but the rate of decline eased in January.

In SA, President Cyril Ramaphosa delivered his State of the Nation Address and Finance Minister Enoch Godongwana presented the National Budget. In these speeches, government updated citizens on the steps it will take to move the economy in the right direction.

After a positive start to 2024, global equity markets accelerated in February, with the MSCI World Index ending the month at 4.24% in dollar terms. Emerging markets (EMs) underperformed developed markets (DMs) for four consecutive months before February but managed to slightly beat DMs, with the MSCI EM Index ending positively at 4.77% month-on-month (m/m) in dollar terms. Chinese equities rallied strongly due to economic stimulus and contributed to the performance of the MSCI EM Index. Although it was announced that Japan slipped into a recession, the Nikkei still managed to end the month positively at 7.99% in yen terms. Both Global Bonds and Global Property entered negative territory at -1.26% m/m and -0.55% m/m in dollar terms. Tech stocks contributed to the S&P 500's positive performance of 5.34% m/m in dollar terms, with Nvidia, Meta and Amazon being the top contributors. The Dow Jones Index was positive at 2.5% m/m in dollar terms and the FTSE gained 0.19% m/m in pound.

The South African stock market was in negative territory in February, when the FTSE/JSE All-Share Index ended at -2.44% in rand terms. Industrials and Financials were negative, at -0.79% m/m and -1.2% m/m, but Resources was the biggest laggard, at -6.92% m/m. Local Property and Cash were both positive for the month, at 0.82% and 0.65% respectively in rand. The bond market underperformed, with the FTSE/JSE All-Bond Index ending at -0.58% m/m in rand terms. Bonds of 1-3 years ended the month at -0.04%, with bonds of 3-7 years at -0.88%, bonds of 7-12 years at -0.78% and bonds of above 12 years ending at -0.53%.

Expectations of sustained higher US interest rates boosted the dollar, which was stronger against all major DM and most major EM currencies in February. The rand was among the worst-performing currencies. It depreciated against the US dollar by -3.05% m/m, the euro by -2.68% m/m and the pound by -2.4% m/m. However, the currency appreciated against the Japanese yen by 2.39% m/m.

Portfolio Management

The management of investments are outsourced to Octagon Asset Managers (Pty) Ltd (FSP) Licence No. 45236, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

Menachem Kay

BCom;
CERTIFIED FINANCIAL PLANNER®

Investment Consultant

The investment consulting is provided by Graviton Financial Partners (Pty) Ltd, (FSP) Licence No. 4210, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

Risk Profile (Cautious)

This portfolio aims to protect capital in real (after inflation) terms, while providing a reasonable level of income. The portfolio displays low volatility levels, designed to reduce the probability of capital losses. This portfolio has limited or no exposure to equities. It is designed for maximum capital protection and aims to ensure a stable income and/or income growth.

Additional Information

All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performances are not necessarily an accurate determination of future performances, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme. The Manager retains full legal responsibility for the co-named portfolio.

Octagon Asset Managers (Pty) Ltd is responsible for the management of the investments held in the Fund. The management of investments are outsourced to Octagon Asset Managers (Pty) Ltd. (FSP) Licence No. 45236, an Authorised Financial Services Provider under the Financial Advisory and Intermediary Services Act, 2002.

Glossary of Terms

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Derivative strategies

A derivative is a financial instrument (like futures and options) that is derived from some other financial instrument, known as the underlying instrument. For example, the Dow Jones Industrial is an indicator of whether the stock market is going up or down.

You can 'bet' on the direction of the Dow by selling a 'futures' contract on it. This futures contract is a derivative as it derives from the Dow Index. If you think the market will go up, you will buy the Dow futures contract, and vice versa.

Diversification

This is a strategy designed to reduce risk within a portfolio by combining a variety of investments (or asset classes) such as equities, bonds, cash or property, which are unlikely to all move in the same direction. This is designed to reduce the risk (and protect against capital losses) within a portfolio. Diversification allows for more consistent performance under a wide range of economic conditions as it smooths out the impact of negative market events. The positive performance of some investments or asset classes should neutralize the negative performance of others.

Equities

An equity or share represents an institution/individual's ownership in a listed company and is the vehicle through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase and this translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling. Shares/equities are usually considered to have the potential for the highest return of all the investment classes, but with a higher level of risk i.e. share investments have the most volatile returns over the short term. An investment in this type of asset should be viewed with a 7 to 10 year horizon.

Fixed-interest investments

Fixed interest funds invest in bonds, fixed-interest and money market instruments. Interest income is a feature of these funds and, in general, capital should remain stable. A fixed-interest investment aims to offer investors a regular income at a set interest rate, which can be fixed over a specified term. If interest rates fall, the fixed-interest investment typically becomes more valuable. Conversely if interest rates rise, the value of the investment will fall.

Fund of Funds

A "fund of funds" is an investment strategy of holding a portfolio of other investment funds rather than investing directly in stocks, bonds or other securities. This type of investing is often referred to as multi-manager investment.

Investing in a fund of funds may achieve greater diversification. The benefit of diversification is that it can reduce volatility and the overall risk in the portfolio, while maintaining returns.

Regulation 28

Regulation 28 of the Pension Funds Act sets out prudent investment limits on certain asset classes in investment funds. It applies specifically to investments in Retirement Annuities and Preservation Funds.

The allowed maximum exposures to certain asset classes is:

75% for equities

25% for property

45% for foreign (offshore) assets

Total Expense Ratio (TER)

This refers to the total costs associated with managing and operating an investment's administration, financial planning and servicing fees. Costs consist of management fees and expenses such as trading, legal and auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.
