

NORTHSTAR GLOBAL FLEXIBLE FUND

A sub-fund of the Sanlam Global Funds plc

NORTHSTAR

MDD Issue Date: 2021/11/19

FUND OBJECTIVE

The objective of the portfolio is to deliver long-term capital growth by investing in various assets classes, predominantly in equity.

FUND STRATEGY

The fund will be managed with a bias towards global equities due to the superior long-term returns from this asset class. If prospective returns from equities are unattractive, exposure to other asset classes, such as real estate, bonds and cash will increase.

ANNUALISED PERFORMANCE (%)

(at 31/10/2021)

*Strategy: Northstar Asset Management are the portfolio manager of the Northstar SCI Global Flexible Fund ("NSSGF"); a SA CIS, which is approved by the SA regulator (FSCA), which follows an identical investment strategy to that of this Fund. The NSSGF's inception date was 12 January 2016. To produce the Strategy data below; the performance of the NSSGF is used between 12 January 2016 and 31 May 2017, and the Northstar Global Flexible Fund performance is used from 01 June 2017 to present. This provides investors and potential investors with a longer-term track record of the Portfolio Manager's performance; this forms the Strategy

Strategy Inception: 12 January 2016	*Strategy	Benchmark
3 Year	13.48	8.12
Since Inception	12.16	6.14

Fund Inception: 01 June 2017	Fund	Benchmark

Past performance is not necessarily a guide to future performance

RISK PROFILE

Medium to high risk

While the manager may diversify across all asset classes, the fund is expected to be meaningfully invested in equities over time. This fund is deemed to be medium to high risk in relation to other asset classes due to its exposure to shares and stocks. The price of shares and the income from them may fall as well as rise and investors may not get back the amount they have invested.

Irish domestic law implementing EU and United Nations sanctions may limit or prohibit investment in certain markets and this may have an adverse impact on the operations of the Fund. Investing in international companies means that currency exchange rate fluctuations will have an impact on the Fund returns. Foreign currency shortages in some markets could reduce the fund's ability to repatriate funds. The investment manager aims to reduce the overall risk by their value and fundamental stance. Other risks are Settlement and Clearing Risk, Political Custody Risk, Legal Risk, Efficient Portfolio Management Risk, Reinvestment of Cash Collateral Risk and Securities Lending Risk. Further information regarding risk can be obtained by reference to the Prospectus and Supplement.

GLOSSARY TERMS

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Equities

Equities are shares that represent an institution's or individual's ownership in a listed company. These shares are also the "vehicle" through which they are able to "share" in the profits made by that company. As the company grows, and the expectation of improved profits increases, the market price of the share will increase which translates into a capital gain for the shareholder. Similarly, negative sentiment about the company will result in the share price falling.

Shares / equities are usually considered to have the potential for the highest return of all the investment classes but also have the highest level of risk i.e., share investments have the most volatile returns over the short term. An investment in equities should be viewed with a 7 to 10-year horizon.

Undervalued equity stocks (Value investing approach)

This is a strategy of selecting shares that trade for less than their intrinsic values. Value investors actively seek stocks that they believe the market has undervalued. They believe the market overreacts to good and bad news, resulting in stock price movements that do not correspond with the company's actual long-term fundamentals. The result is an opportunity for value investors to profit by buying when the price is deflated.

Securities

A general term for shares, bonds, money market instruments and debentures.

Collective investment scheme (CIS)

Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment (administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.

Disclaimer

Northstar is an authorised financial services provider (license number 601). The Northstar Global Flexible Fund launch date is 1 June 2017. Further details of the fund are available at www.sanlam.ie. The graphs and detail are intended to provide the user with an indication as to how the fund will function, nothing is guaranteed. There are risks involved in buying or selling financial products. Past performance is not necessarily indicative of future performances. Please refer to <http://northstar.co.za/page/legal-information/>.

PORTFOLIO MANAGER

Rory Spangenberg joined Northstar in January 2017 as an analyst, with a focus on global research and investments. Rory joined Northstar from SignalHill Investment Management, where he was the managing director and portfolio manager.

Prior to SignalHill, Rory spent 10 years with Investec managing value and income growth strategies. Experience prior to that includes: heading the South African research sales desk at Investec, London; research sales for Barnard Jacobs Mellet; and equity portfolio manager of the Sasol Pension Fund.

PORTFOLIO MANAGER COMMENT

As at 30 September 2021

Portfolio Review:

The Northstar Global Flexible Fund A USD delivered a return of -1.01% in US dollars for the 3 months to end-September 2021, below that of the median fund in the Morningstar EAA USD Flexible Allocation Fund peer group of -0.63%.

For the 12 months to September 2021 the Fund returned +15.99%, ahead of the Morningstar peer group return of +12.19% and in-line with the Fund's strategic composite comprised of 60% MSCI World Index and 40% Bloomberg Barclays Global Aggregate Bond Index, which returned +16.4%.

Longer term performance continues to reflect meaningful outperformance of all benchmarks ensuring retention of the strategy's top decile peer ranking.

Global equities experienced a volatile quarter, with the MSCI All Country World Index declining -4.09% in September to end -0.95% over the 3 months. Emerging Markets (MSCI GEM -7.97%) and US Small Caps (Russell 2000 -4.36%) were particularly weak, with Japanese equities (Nikkei 225 +2.44%) being a notable outlier to the upside.

Sector divergence was notable, with Financials (MSCI World Financials +2.21%), Energy (+1.64%) and Information Technology (+1.48%) benefitting from a combination of positive sentiment towards cyclicals, a higher oil price and a steeper yield curve, while Materials (-4.92%) and Consumer Staples (-1.75%) lagged.

Longer dated US Treasuries (20+ Years -2.61%) surrendered some of the previous quarter's strong gains, whilst Treasury Inflation Protected Securities (iShares TIPS ETF +1.61%) and junk bonds (iBOXX USD High Yield +0.51%) bucked the general negative trend in fixed interest.

The price of a barrel of Brent Crude rose 9.3% in September and 4.9% during the quarter.

Equities outperformed both cash and bonds and therefore our decision to remain overweight equities and to prefer cash to bonds once again proved the correct one. Underlying equity selection, however, detracted from performance with: Alibaba (-89bps of gross equity return), Reckitt Benckiser (-43bps) and Tencent (-29bps) delivering negative attribution. Positive attribution from Blackstone (+68bps), Jones Lang LaSalle (+50bps) and Oracle (+40bps) compensated somewhat.

Portfolio Positioning:

Having extended duration within our modest fixed income allocation in the previous quarter, we took the decision to reduce duration once again and to capitalize on gains we saw from this position. We continue to view bond valuations with some skepticism and caution.

The weakness in equities as well as an element of style rotation over the past month has afforded some opportunities and we have been adding to exposure in this asset class.

Having said that, the level of concentration or tracking error has been reduced quite meaningfully, with more exposure to the belly and tail of the portfolio, reducing the reliance on a relatively small number of companies to deliver return.

Regulatory statement

The Fund is a sub-fund of the Sanlam Global Funds plc, an open-ended Umbrella type Investment Company, with segregated liability between its sub-funds, authorised by the Central Bank of Ireland, as a Retail Investors Alternative Investment Fund, a category of non-UCITS collective investment scheme to which the Companies Act 2014 and Chapter 1 of the AIF Rule Book applies. The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.

The Sanlam Global Funds Plc full prospectus, the Fund supplement, and the MDD is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Global Funds plc prospectus, the Fund supplement and the MDD. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. A schedule of fees and charges and maximum commissions is available on request from the Manager.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

The information to follow does not constitute financial advice, solicitation, invitation or investment recommendation as contemplated in terms of the South African Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment, decision, not all investments are suitable for all investors. Collective investment schemes are generally medium to long term investments.

Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. The validity and accuracy of any illustrations, forecasts or hypothetical data are not guaranteed and are only provided for illustrative purposes. Changes in exchange rates may have an adverse effect on the value, price or income of the product. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending.

Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Trail commission and incentives may be paid and are for the account of the Manager. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. The Manager retains full legal responsibility for this fund. Performance figures for periods longer than 12 months are annualized.
