

Fund Objective

The fund seeks long term capital growth over the long term by investing in selected shares across all industry sectors of the JSE. This fund is suitable for investors who can withstand potential capital volatility in the shorter term. The fund may also invest in participatory interest (units) of collective investment schemes.

Fund Strategy

Typically this fund will hold a large weighting in JSE shares with a maximum equity exposure of 75%. Capital exposure will also include investments in money market instruments, bonds, listed property and up to 45% in offshore assets. Fund risk is lower than that of a pure equity fund. This portfolio may also invest in participatory interests of underlying unit trust portfolios.

Why choose this fund?

*By investing in a single fund which diversifies across all major asset classes, investors 'outsource' the difficult decision of how much and when to invest in various asset classes.

*The fund may hold a maximum of 75% in equities making it less volatile than a general equity fund.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Sanlam Collective Investments (RF) (Pty) Ltd is a registered and approved Manager in Collective Investment Schemes in Securities. Collective investment schemes are generally medium- to long-term investments. Past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager on request. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge. Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Forward pricing is used. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Performance is calculated for the portfolio and the individual investor performance may differ as a result of initial fees, actual investment date, date of reinvestment and dividend withholding tax. The manager has the right to close the portfolio to new investors in order to manage it more efficiently in accordance with its mandate. The performance of the portfolio depends on the underlying assets and variable market factors. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result in a higher fee structure for our portfolio. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 ("CISCA"). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates.
