

Fund Objective

The investment objective of the Zazove Global Convertible Securities Fund (the "Fund") is to provide global equity-like returns with significantly less risk. The objective is achieved by seeking to capture the majority of stock market advances while simultaneously providing downside protection during market declines. Statistical focus on convertible structure is used to create a balanced, diversified portfolio that optimizes the asymmetrical risk/reward characteristics of convertibles. The investment approach is not reliant on forecasting or market timing. The Fund strives for a consistent risk/reward profile at all times.

Transfer Agency	Northern Trust International Fund Administration Services (Ireland) Limited
Domicile	Ireland
Listing	Irish Stock Exchange
Salient Risk Factors	Convertible Securities are subject to the risks of stocks when the underlying stock price is high relative to the conversion price (because more of the security's value resides in the conversion feature) and debt securities when the underlying stock price is low relative to the conversion price (because the conversion feature is less valuable). A convertible security is not as sensitive to interest rate changes as a similar non-convertible debt security, and generally has less potential for gain or loss than the underlying stock.
Base Currency	US Dollar

Distribution	This fund does not distribute. Dividends and income are automatically added to the NAV of the fund

Portfolio Manager Monthly Comment

Global Equities declined in February pressured by growing concerns regarding the economic impact of tariffs. Performance varied significantly by region with European and Asia equities advancing and the US and Japan declining. Small cap names were particularly hard hit. Fixed income rose led by high grade, and corporate credit spreads widened modestly. Convertible performance largely mirrored the equity markets with gains in Europe and Asia largely offset by weakness in the US, particularly in Technology and Crypto names. The convertible primary market was active in February with \$6.3 billion of new paper mostly out of the US with modest additional issuance from Europe, Asia, and Japan. Market volatility and a solid primary calendar resulted in heightened convertible trading volumes during the month.

The Fund returned +0.64% net in February providing significant downside protection when markets sold off toward the end of the month. Holdings in Europe and Asia gained while the Americas and Japan declined modestly. Technology, Healthcare, and Utilities were the top sectors while Industrials was the only meaningful detractor. Trading activity focused on locking in gains on names that moved up the curve as well as selling positions that had become more bond like. Proceeds were reinvested in balanced names across sectors and regions.

Fees *

Initial fee / Front end load	0%
Management fee	0.60%
Investment Management Fee	N/a—to be paid by the Manager
Performance fee	15% of difference between NAV and benchmark. See Supplement for details
Exit Fee	Not applicable

Risk Profile

The Fund is suitable for retail and institutional investors who are looking to achieve long-term capital growth. Investment in the Fund should be viewed as a medium to long term investment and therefore investors would be expected to have a reasonable tolerance for medium volatility of net asset value from time to time.

Regulatory statement

The Fund is a sub-fund of the Sanlam Universal Funds plc, a company incorporated with limited liability as an open-ended umbrella investment company with variable capital and segregated liability between sub-funds under the laws of Ireland and authorised by the Central Bank.

The Fund is managed by Sanlam Asset Management (Ireland) Limited, Beech House, Beech Hill Road, Dublin 4, Ireland, Tel + 353 1 205 3510, Fax + 353 1 205 3521 which is authorised by the Central Bank of Ireland, as a UCITS Management Company, and an Alternative Investment Fund Manager, and is licensed as a Financial Service Provider in terms of Section 8 of the South African FAIS Act of 2002.

The Sanlam Universal Funds Plc full prospectus, the Fund supplement, the MDD and the KIID is available free of charge from the Manager or at www.sanlam.ie. This is neither an offer to sell, nor a solicitation to buy any securities in any fund managed by us. Any offering is made only pursuant to the relevant offering document, together with the current financial statements of the relevant fund, and the relevant subscription/application forms, all of which must be read in their entirety together with the Sanlam Universal Funds plc prospectus, the Fund supplement the MDD and the KIID. No offer to purchase securities will be made or accepted prior to receipt by the offeree of these documents, and the completion of all appropriate documentation. A schedule of fees and charges and maximum commissions is available on request from the Manager.

This is a Section 65 approved fund under the Collective Investment Schemes Control Act 45, 2002 (CISCA). Sanlam Collective Investments (RF) (Pty) Ltd is the South African Representative Office for this fund.

The information to follow does not constitute financial advice as contemplated in terms of the South African Financial Advisory and Intermediary Services Act

Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision, not all investments are suitable for all investors.

Collective Investment Schemes (CIS) are generally medium to long term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future performance. Changes in exchange rates may have an adverse effect on the value, price or income of the product.

The information to follow does not constitute financial advice as contemplated in terms of the South African Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk.

Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ based on the initial fees applicable, the actual investment date, the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Trail commission and incentives may be paid and are for the account of the Manager.

The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates. Performance figures for periods longer than 12 months are annualized

Glossary Terms

Annualised total returns

Annualised return is the weighted average compound growth rate over the period measured.

Capital growth

Capital growth is the profit made on an investment, measured by the increase in its market value over the invested amount or cost price. It is also called capital appreciation.

Convertible Securities

Convertible securities are securities which can be converted into another security. For the purpose of the Zazove Global Convertible Securities Fund, these securities are typically corporate bonds or preferred stocks which can be converted into shares of a common stock at a predetermined conversion ratio at the discretion of the holder of the security.

Securities

A general term for shares, bonds, money market instruments and debentures.

Collective investment scheme (CIS)

Collective investment schemes (also called unit trusts) are portfolios of assets such as equities, bonds, cash and listed property, in which investors can buy units. They allow private investors to pool their money together into a single fund, thus spreading their risk across a range of investments, getting the benefit of professional fund management, and reducing their costs.

Total Expense Ratio (TER)

This is the total costs associated with managing and operating an investment administration, financial planning and servicing fees). These costs consist primarily of management fees and additional expenses such as trading fees, legal fees, auditor fees and other operational expenses. The total cost of the fund is divided by the fund's total assets under management to arrive at a percentage amount, which represents the TER.

Standard deviation

Standard deviation (also called monthly volatility) is a measure of how much returns on an investment change from month to month. It is typically used by investors to gauge the amount of expected volatility in an investment.
