

Fund Description

The fund's objective is to provide levels of investment growth that are in line with its risk profile. The relatively low equity allocation of this fund is expected to result in less volatile returns over the short term, but also lower long term growth when compared to the SMM 50 and SMM 70 funds.

The Portfolio comply with the provisions of Regulation 28, issued under the Pension Funds Act (Act No. 24 of 1956), as amended.
