

Fund Description

The portfolio is designed to provide long-term returns higher than that of a typical global balanced fund. The portfolio is suited for investors who have a long term investment horizon and can accept short term volatility. The fund has a multi-managed investment approach that incorporates a blend of active and passive investment strategies.

Total Investment Costs (TIC)

| Total Expense Ratio (TER) | Transaction Costs (TC) | Total Investment Charges (TER + TC) |
|---------------------------|------------------------|-------------------------------------|
| 1.23% | 0.12% | 1.35% |

The TER was incurred as expenses relating to the administration of the Financial Product. The TC was incurred as costs relating to the buying and selling of the assets underlying the Financial Product. The TIC was incurred as costs relating to the investment of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

The TER shown above is based on the highest fee tier where applicable and is calculated as at 31 March 2021.

Inclusive in the TER of 1.23%, a performance fee of 0.11% was recovered.
