

Sanlam

Sanlam Investments (UK) is the global asset management arm of Sanlam Limited. We are an investment-led boutique offering actively-managed core and thematic funds; concentrated and high-alpha strategies are a speciality of ours. We place our clients' interests and their investment outcomes at the centre of everything we do. Our parent, Sanlam Limited, has over 100 years of heritage and is listed on the Johannesburg Stock Exchange with a market cap of £8bn. It has over £55bn of assets under management and a AA(+) credit rating from Fitch Ratings.

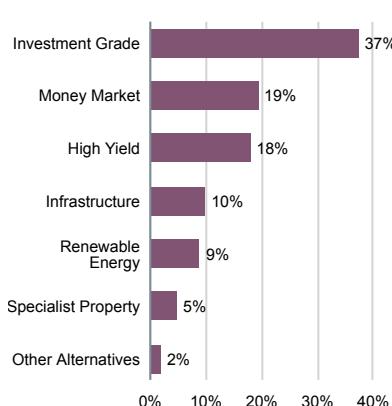

Fund Overview

The fund invests in a diversified portfolio of instruments across a variety of different asset classes. The instruments are selected on the basis of proprietary multi-asset trading strategies which may result in the fund investing in the underlying instruments on a long/short basis. The fund will invest in equities, fixed income securities, CIS and ETFs. The fund will also invest in FDI in the form of listed futures and options in order to gain indirect exposure to these instruments and asset classes. The team employs stringent risk analysis and stop loss positions to provide downside protection

Risk Factors

The Fund has holdings which are denominated in currencies other than sterling and may be affected by movements in exchange rates. The Fund can invest in derivatives. Derivatives are used to protect against fluctuations in currencies, credit risk and interest rates or for investment purposes. There is a risk that losses could be made on derivative positions or that the counterparties could fail to complete on transactions. The Fund's expenses are charged to capital. This has the effect of increasing dividends while constraining capital appreciation. Part of the fund is invested in bonds. Investment in bonds and other debt instruments is subject to interest rate risk and risk of default by the issuer. The value of this portfolio is subject to fluctuation and past performance is not necessarily a guide to future performance. The performance is calculated for the portfolio and the actual individual investor performance will differ as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. All terms exclude costs. Fluctuations or movements in exchange rates may cause the value of underlying investments to go up or down. Do remember that the value of participatory interests or the investment and income generated from them may go down as well as up and is not guaranteed, therefore, you may not get back the amount originally invested and potentially risk total loss of capital. Therefore, the Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The Yield is calculated on historic dividend income from the preceding 12 months. Since the yield is based on past information it is provided as a guide and should not be taken as a guaranteed yield. If fees are charged to the capital account then this could reduce the amount invested. Income may fluctuate in accordance with market conditions and taxation arrangement's. The Manager has the right to close any Portfolios to new investors to manage them more efficiently in accordance with their mandates.

Additional Disclaimers
