Fund Objective
The Fund is a cautiously managed Rand denominated offshore portfolio that is well diversified in terms of asset classes (equities, bonds, property & cash), countries and currencies. It aims to provide investors with moderate capital growth over the medium to long term with relatively low volatility in US Dollar terms.

Fund Strategy
The fund is actively managed through the Sanlam International Investment Team’s research driven investment process. We employ active asset allocation and investment manager allocation strategies appropriate to the fund’s objective. The fund focuses on risk adjusted returns, performance delivery and volatility management.

Why choose this fund?
• The Fund will not hold more than 40% in equities which will provide more stability than a traditional balanced fund.
• By investing in a single fund that diversifies across all major international asset classes, investors “outsource” the difficult decision on how much and when to invest in various asset classes.
• Investors seeking to invest in global markets and choose to do so through a less volatile or more conservative option are well suited to invest in this fund.
• It is a Rand denominated international fund. No foreign exchange tax clearance is required.

Risk Considerations
• Investing in international asset classes means that currency exchange rate fluctuations will have an impact on the performance of the fund.
• As the SA Rand can be a volatile currency, this could lead to significant fluctuations in the Rand value of this fund.

Risk Profile (High (ZAR) / Cautious (USD))
Your primary aim is to achieve capital growth to realise your goals. You are prepared to tolerate fluctuations in your returns because you know that the longer-term picture is worth the short term pain, even if that means you lose money sometimes. While diversified across all the major asset classes, your portfolio will be tilted more towards equities because you know they offer the best long-term returns of all the asset classes and thus your wealth will grow over time.

Additional Information
All reasonable steps have been taken to ensure the information on this MDD is accurate. The information to follow does not constitute financial advice as contemplated in terms of the Financial Advisory and Intermediary Services Act. Use or rely on this information at your own risk. Independent professional financial advice should always be sought before making an investment decision.

The Sanlam Group is a full member of the Association for Savings and Investment SA. Collective investment schemes are generally medium- to long-term investments. Please note that past performance is not necessarily a guide to future performance, and that the value of investments / units / unit trusts may go down as well as up. A schedule of fees and charges and maximum commissions is available from the Manager, Sanlam Collective Investments (RF) Pty Ltd, a registered and approved Manager in Collective Investment Schemes in Securities. Additional information of the proposed investment, including brochures, application forms and annual or quarterly reports, can be obtained from the Manager, free of charge.

Collective investments are traded at ruling prices and can engage in borrowing and scrip lending. Collective investments are calculated on a net asset value basis, which is the total market value of all assets in the portfolio including any income accruals and less any deductible expenses such as audit fees, brokerage and service fees. Actual investment performance of the portfolio and the investor will differ depending on the initial fees applicable, the actual investment date, and the date of reinvestment of income as well as dividend withholding tax. Forward pricing is used. The Manager does not provide any guarantee either with respect to the capital or the return of a portfolio. The performance of the portfolio depends on the underlying assets and variable market factors. Performance is based on NAV to NAV calculations with income reinvestments done on the ex-div date. Lump sum investment performances are quoted. The portfolio may invest in other unit trust portfolios which levy their own fees, and may result is a higher fee structure for our portfolios. All the portfolio options presented are approved collective investment schemes in terms of Collective Investment Schemes Control Act, No 45 of 2002 (“CISCA”). The fund may from time to time invest in foreign countries and therefore it may have risks regarding liquidity, the repatriation of funds, political and macroeconomic situations, foreign exchange, tax, settlement, and the availability of information. The Manager has the right to close any portfolios to new investors to manage them more efficiently in accordance with their mandates. The portfolio management of all the portfolios is outsourced to financial services providers authorized in terms of the Financial Advisory and Intermediary Services Act, 2002. Standard Bank of South Africa Ltd is the appointed trustee of the Sanlam Collective Investments Scheme.

The highest and lowest 12-month returns are based on a 12-month rolling period over 10 years or since inception where the performance history does not exist for 10 years.
